

Sir, I have divided my complete work into three phases::

- A) Statistical Part
- B) Analysis Part
- C) Generating Tool
- D) Documentation

## Work to Do

----

## Deadline

### **A. Statistical Part**

- I. Complete the table
  - a. Input for all existent folders
  - b. Complete table for Compile-Time ,Memory(Compile&Run Time),LOC's
  - c. Complete Run-Time values
- II. Add extra folder 'Miscellaneous',(containing Large-Standard Programs)
  - a. Input for all existent folders
  - b. Complete table for Compile-Time ,Memory(Compile&Run Time),LOC's
  - c. Complete Run-Time values
- III. Fill values for 'Haskell'
- IV. Fill values for 'Cython'
- V. EoW/Debugging
- VI. Security(Static)

**11<sup>th</sup> Feb'13**

15<sup>th</sup> Jan'13  
15<sup>th</sup> Jan'13  
16<sup>th</sup> Jan'13  
21<sup>st</sup> Jan'13  
18<sup>th</sup> Jan'13  
19<sup>th</sup> Jan'13  
20<sup>th</sup> Jan'13  
30<sup>th</sup> Jan'13  
05<sup>th</sup> Feb'13  
07<sup>th</sup> Feb'13  
10<sup>th</sup> Feb'13

### **B. Analysis Part**

- I. Some Static analysis about programming languages and their basic features
- II. Detailed analysis of each field for various results

**28<sup>th</sup> Feb'13**

16<sup>th</sup> Feb'13  
27<sup>th</sup> Feb'13

### **C. Generate Tool**

- I. Make GUI framework/Tool to manifest the results
- II. Automate the whole tool
- III. User Input
  - a. Enable input from user
  - b. Check the correctness
  - c. Include in the Pool
